

# Ranga Sashank Gurram

+1 250-514-6799 | [grsashank2003@gmail.com](mailto:grsashank2003@gmail.com) | Victoria / Vancouver, BC | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

## Summary

Forward Deployed Engineer and Full Stack Developer with 2 years of professional and co-op experience delivering client solutions, integrations, and production migrations. Works across discovery, root-cause analysis, development, rollout, and documentation, with a focus on secure validation, human review, and operational safeguards.

## Education

**BSc Computer Science, Specialization in Software Systems**

Aug 2026

*University of Victoria*

Runner-up, 2025 Engineering & Computer Science Co-op Student of the Year

## Technical Skills

**Delivery & Discovery:** Requirements Translation, Stakeholder Collaboration, Root-Cause Analysis, Training, Runbooks

**Data & Migration:** Python, TypeScript, PHP, SQL, MongoDB, Mongoose, PostgreSQL, Schema Mapping, Idempotency, Audits

**Full-Stack:** React, Next.js, Node.js, Express.js, FastAPI, REST APIs, Webhooks, BullMQ, Redis, Background Jobs

**Integrations & AI:** WordPress/MemberPress, Stripe, Nylas, SendGrid, Customer.io, LLM & MCP Servers, OpenAI, RAG

**Cloud & DevOps:** AWS (Elastic Beanstalk, EC2, S3), Docker, Git, CI/CD, Jenkins, Postman, Production Monitoring

**Practices:** Multi-Tenant Security, JSON Schema Validation, PII Redaction, Dry-Run Safeguards, Testing

## Professional Experience

**Meaningful** — *Forward Deployed Engineer*

May 2026 – Present | Vancouver, BC (Remote)

- Delivered implementations for **4 association clients** by translating stakeholder needs into platform configuration, React/Next.js changes, Node.js services, MongoDB migrations, launch plans, and guides.
- Migrated **19,000+ records across 10 phases** with IDs preserved by building idempotent TypeScript/Mongoose scripts and auditing contacts, memberships, invoices, communications, events, and access settings.
- Resolved **8 client workflow gaps** and converted findings into **6 reusable platform improvements** by leading technical discovery, tracing root causes, and shipping validation, staff controls, event emails, and preview-before-commit imports.
- Engineered a fault-tolerant **WordPress/MemberPress sync** with PHP and Node.js, implementing **automated run-aborts on >10% record deltas** to prevent destructive data overwrites.
- Reduced rollout risk with **18+ repeatable scripts** by enforcing staging and dry-run defaults, strict queries, idempotency checks, production audits, and operator/client documentation.

**Meaningful** — *Full Stack Developer Co-op*

Jan 2026 – Apr 2026 | Vancouver, BC (Remote)

- Expanded **5 revenue and member modules**, including events, memberships, sponsorships, auctions, and scheduling, through React/Next.js interfaces backed by Node.js, MongoDB, Stripe, and job queues.
- Exposed **160+ platform operations** to AI workflows by building **5 type-safe MCP servers** with TypeScript, Node.js, MongoDB, API-key controls, and 100+ test scenarios.

**Inspire, University of Victoria** — *Software Engineer Co-op*

Sep 2025 – Dec 2025 | Victoria, BC

- Onboarded **3 nonprofit organizations** by translating user needs into an AI meeting platform built with Next.js, Express, OpenAI, Redis, BullMQ, and AWS Elastic Beanstalk.
- Improved briefings and follow-up drafts for **20+ study participants** by combining CRM history, email activity, and user feedback with **multi-stage LLM safeguards**, including deterministic JSON schema validation, PII redaction, and hallucination guardrails.

## Projects

**ReleasePilot** — *AI Release Readiness Platform / Python, FastAPI, Next.js, MCP*

Sep 2026 | Victoria, BC

- Built an **AI release-readiness platform** analyzing GitHub PRs, commit diffs, CI runs, and runbook RAG to produce cited risk reports and **deterministic GO/CAUTION/NO\_GO** deployment recommendations.
- Orchestrated a **3-agent MCP workflow** with Pydantic handoffs, enforcing **hard blockers on failed CI**, idempotent job processing, signed GitHub webhooks, and Redis caching to eliminate deployment risks.

**Cross-Meeting Insights** — *1st Place, Inspire Hackathon*

Oct 2025 | Victoria, BC

- Won **1st place** by connecting CRM history to live Nylas transcripts and using OpenAI to prioritize follow-up actions in a real-time Node.js service.
